

HEALTH INSURANCE LIMITATIONS

- Your Health insurance plan guarantees you a certain number of chiropractic office visits per calendar year per family member.
- To receive additional treatment beyond your limits, additional documentation is needed to prove medical necessity for the justification of additional care. Our office is more than glad to provide this additional documentation as a service to our patients at no additional cost to you or to Blue Cross Blue Shield.
- It has been our experience that Blue Cross Blue Shield will allow in most cases some additional care. By no means can we guarantee they will approve additional care beyond allotted number of treatments.
- We will always base our treatment recommendations on what we determine best serves you and your condition and not what your insurance covers. Therefore, *for whatever reason*, if precertification is not obtained for additional care beyond your visit limits *you will be responsible for the additional costs.*
